LOCKOUT / TAGOUT EQUIPMENT

# LEND LEASE CASE STUDY

## SAFETY IS FRONT OF MIND AT THE NEW SUNSHINE COAST HOSPITAL

The \$1.8 billion Sunshine Coast Public University Hospital project is a State Government initiative to address the growing health service needs of the Sunshine Coast community. The hospital will open with approximately 450 beds in 2016 with the remaining capacity expected to be commissioned by 2020/21 which will see all 738 beds utilised. The hospital has been planned to allow further expansion up to a total of 900 beds.

The new tertiary facility is being delivered through a Public Private Partnership (PPP) contract with Exemplar Health, a consortium comprising Lend Lease, Siemens and Capella Capital, with partners Spotless Facilities Services. This consortium will design, build and finance the public hospital as well as maintain it for 25 years.

Cirlock were contacted by Lend Lease to provide their Cirlock System of Permanently Mounted Lockout Devices for Distribution Boards. This involved the purchase of a number of key items for use on the hospital project, for example their 2 x 12 pole Schneider NS250 board with 35mm pole width required the MAM-12 Mounting Set plus 6 x Lockout Arms to suit.

Andrew Hudson, LV Design Manager, Power, at Lend Lease says Lend Lease chose Cirlock for the job as they consider the Cirlock products a level of quality that should be standard on all

projects. They simply would not settle for anything less. "Safety is paramount in any of the construction jobs we work on", says Andrew, "and using Cirlock locks gives us confidence that we have the added level of safety we require. Cirlock lock out devices are used on all Low Voltage Distribution Board Circuit Breakers to ensure safety for site electricians. Electricians lock out the Circuit Breaker fitted with Cirlock with personal padlock and danger tag, this with other safety procedures help to ensure their safety with the circuit they are working on".

Andrew continued to say, "The service you get from Cirlock is always prompt and professional, that's how they do business and that goes a long way in this industry. Deadlines are crucial to the smooth running of all projects, particularly a project like the Sunshine Coast Hospital, so getting the parts we needed delivered to spec and on time is a major factor in the success of what we do".

Lend Lease did not experience any problems with their contact and purchase from Cirlock and described their opinion of the Cirlock products as simply, "Quality". Lend Lease said they would definitely use Cirlock again on any of their projects and have already recommended the Cirlock service products to other industry contacts.
